Engine Body Introduction.....

Game Profile:

Game Name: Lucky Fish Frenzy

Game type: Multiplayer entertainment lottery

Configuration-

CPU: I3 processor

Memory: 2G

Hard drive: 32G

Sound card: Directx sound compatible

Video card: GTX650

Game controls:

1. Put game coin into the slot.
2. The ball above is moving from one side to another; find the right time to press the control button, the ball will drop in the current position. Players can also do multiple keystrokes, and more balls will drop (up to 4 balls dropped).
3. If the ball drops into the fish tank, certain number of lottery tickets will be obtained.

Game features:

1. Networking function

Support multiplayer of multiple machines fighting for LUCKY FISH Alphabet Jackpot (JP award).

2. Random Lottery Award

The green lottery score of the first fish tank changes randomly, which is divided into four sets of values (for example: 10.20.30.40) that are changing randomly. Players drop the balls at the right timing can obtain different lottery scores; the scores can be set in the background.

3. Bonus Ball Award

When the bonus-ball fish tank (labeled "Bonus Ball ") is won, the game will automatically drop N balls, and the number of bonus balls can be set in the background.

4. Double Lottery Award

When Double-Lottery Fish Tank (labeled "X2") is won, the double lottery stage will start. In addition to bonus-ball fish tank, ultimate awards, consolation awards, the lottery of all the other fish tanks will be doubled. At this stage, the players can obtain more lottery tickets.

5. JP Award

Winning Alphabet Fish Tank (marked with specific letters) will bring the corresponding letters. When the **LUCKY FISH** on top of the interface has been completely lightened up, the ultimate prize can be received, and the scores can be set in background.

Common hardware settings:

1. Coin selector

The coin selector setting: Fast (20ms) & Accurate

2. Lottery

The lottery setting: Fast & Normal open & Low power level
